Subject: questions for AO Re CEC Council Session

Mark-

- How much funding does AO have for CEC Council Session—if less than originally identified, does AO want to reduce some of the activities/events on the 26 (like the private meeting space for the ministers at the ballpark?)?
- Gift – the ministerial gift could be fabricated at the Innovation Hub to make it more meaningful in relation to the them and objectives of the activities at OU. Is AO interested in this option? Would AO have a preferred design? Could be made in sustainable wood or plastic.
- Would partners at OU (like the president, Deans for Innovation Hub and National Weather Service) be invited to the closing dinner? Additional invitees increase costs but these are key partners.
